

FRABA B.V.
Jan Campertstraat 9
6416 SG Heerlen (NL)

9th June 2022

Dear Sir or Madam:

We hereby confirm that to the best of our knowledge, the products delivered to you do not contain any substances in concentrations or applications that are forbidden in accordance with the applicable requirements of Directive 2011/65/EU including the Delegated Directive (EU) 2015/863.

EG-VO 1907/2006 — Reach

FRABA does not deliver any chemical products, chemical substances as such, or preparations as REACH defines them. FRABA only delivers finished products that have been designated in the REACH Regulation as "articles". Furthermore, no chemical substances are released by these products under normal and reasonably foreseeable conditions of use corresponding to the definition in REACH.

Based on the reasons mentioned above, we have come to the conclusion that FRABA currently is not subject to the obligations of a manufacturer or importer of chemical substances in accordance with the REACH Regulation.

The list of [SVHC](#) is published and was updated last on January 17, 2022. It contains a total of 223 substances. According to our current state of knowledge, our products – including components and packing materials – do not contain substances that are part of the list of SVHC in amounts greater than 0.1 weight-%. Neither do we use substances listed in Annex XVII in restricted applications.

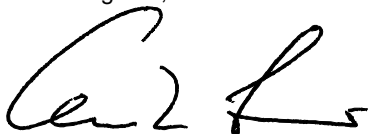

But the following exceptions are used:

1. Lead, CAS-No. 7439-92-1, as alloying element in turned or milled metal parts and connectors
2. Cobalt dichloride, CAS-No. 7646-79-9, in Lithium batteries at CODORMO

Independent of the current information, FRABA is in constant contact with its suppliers in order to review changes with regard to the REACH guidelines.

If you should have any further questions, please feel free to contact us at any time.

Best Regards,

Christian Leeser
FRABA B.V.
